

FITNESS APP UX/UI DESIGN

JANET BRANDON

ABOUT

SWIM STATS APPLICATION

FORM is a Canadian tech company specializing in smart swimming technology. Their current application allows users to track their swim statistics and improve their overall performance over time.

For this application, we used user experience methods to update the design of the Goals feature in the FORM application.

PROBLEMS

User engagement with the Goals feature is low

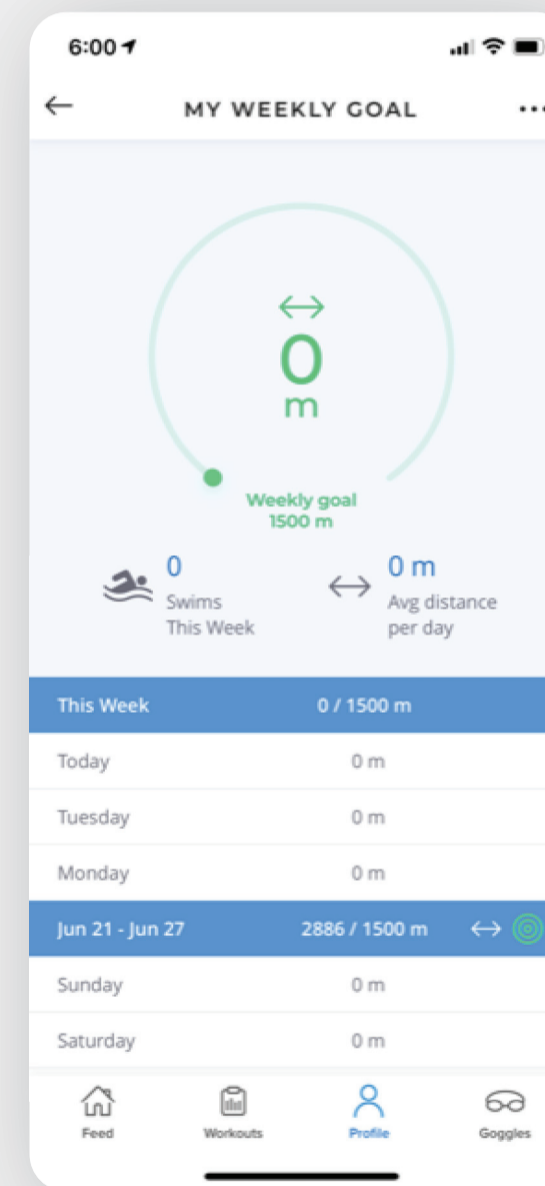

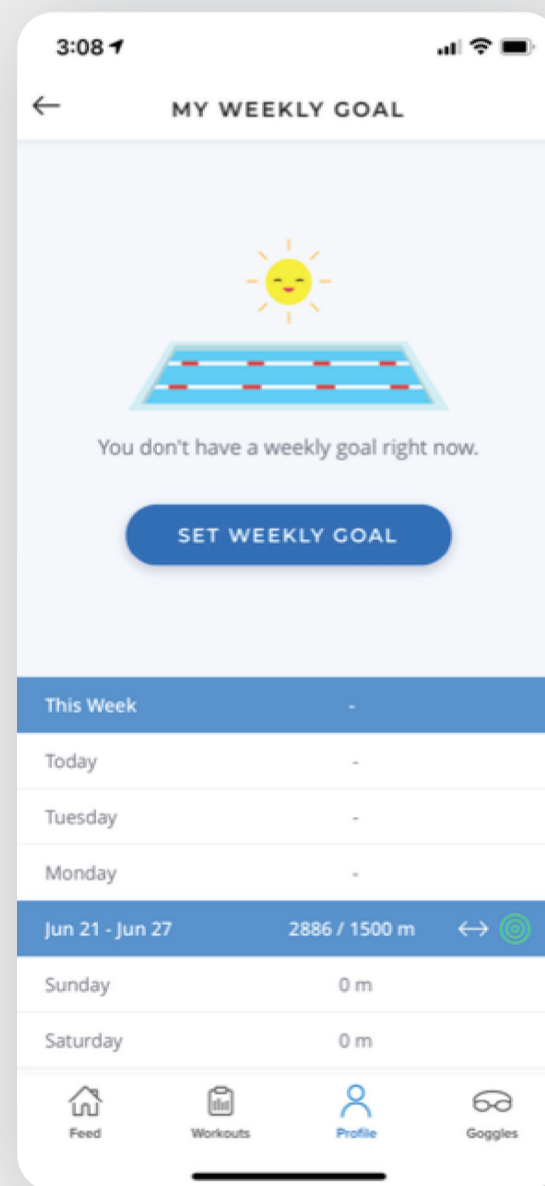

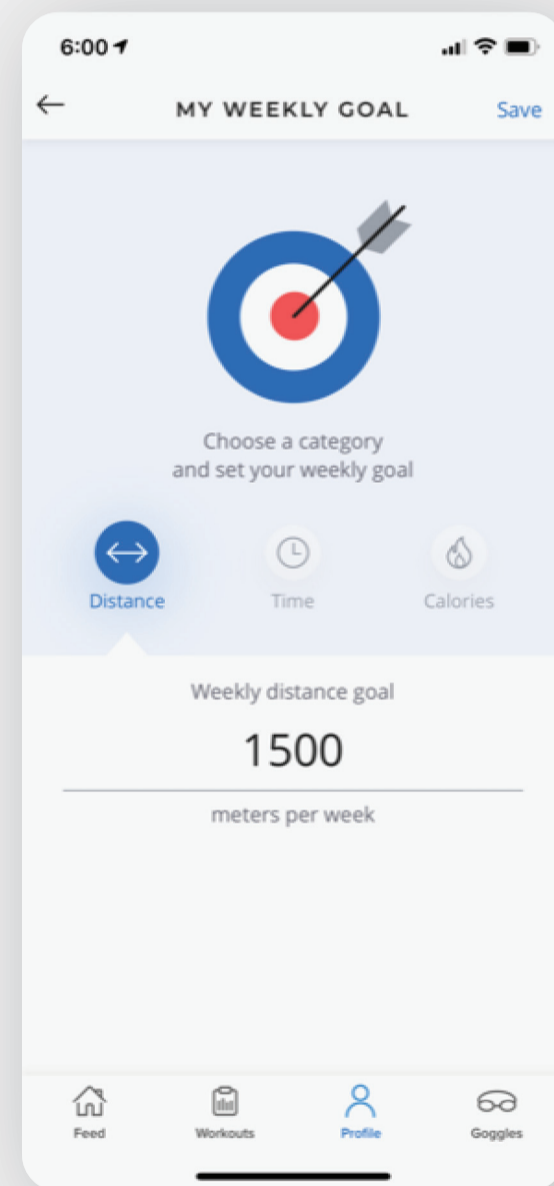

The Goals feature is limited in terms of types of goals users can set

The Goals feature is visually inconsistent with the rest of the app

Profile screen is out of date and lacking in visual interest

ORIGINAL DESIGN

MOOD

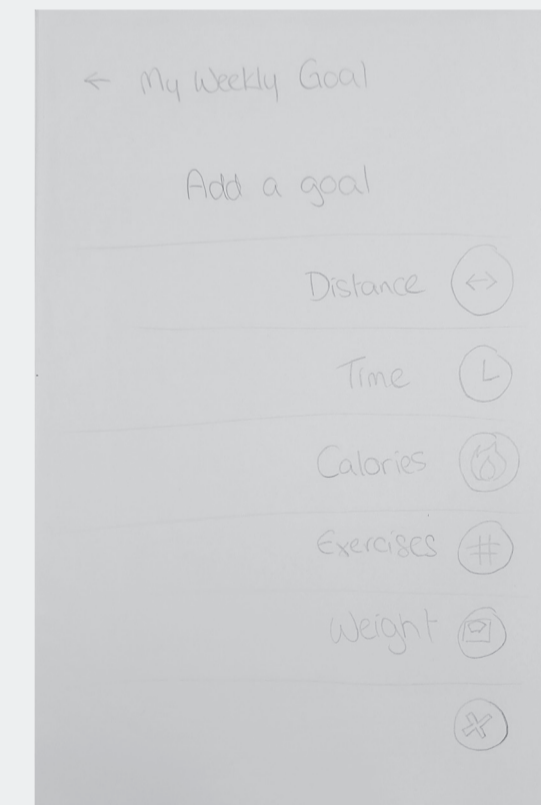

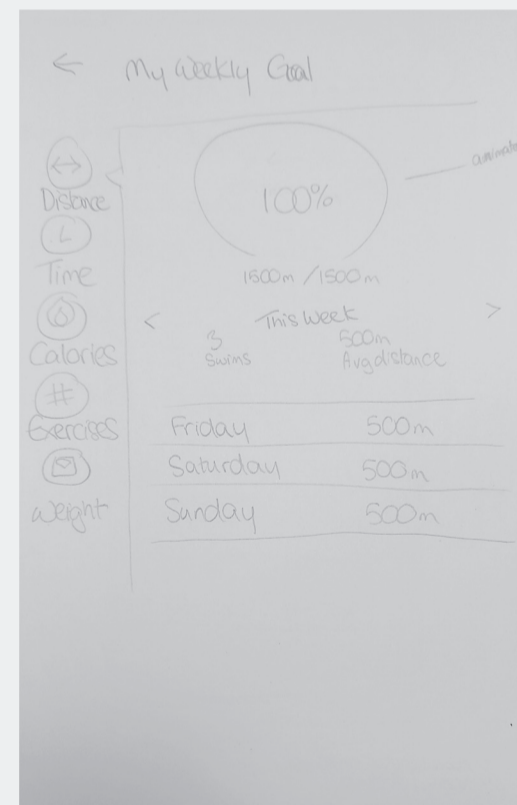

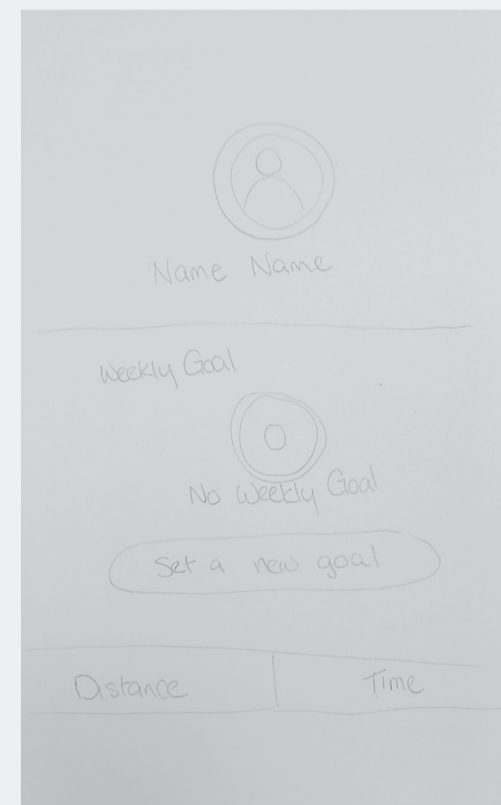

MONTSERRAT SEMIBOLD

Open Sans SemiBold

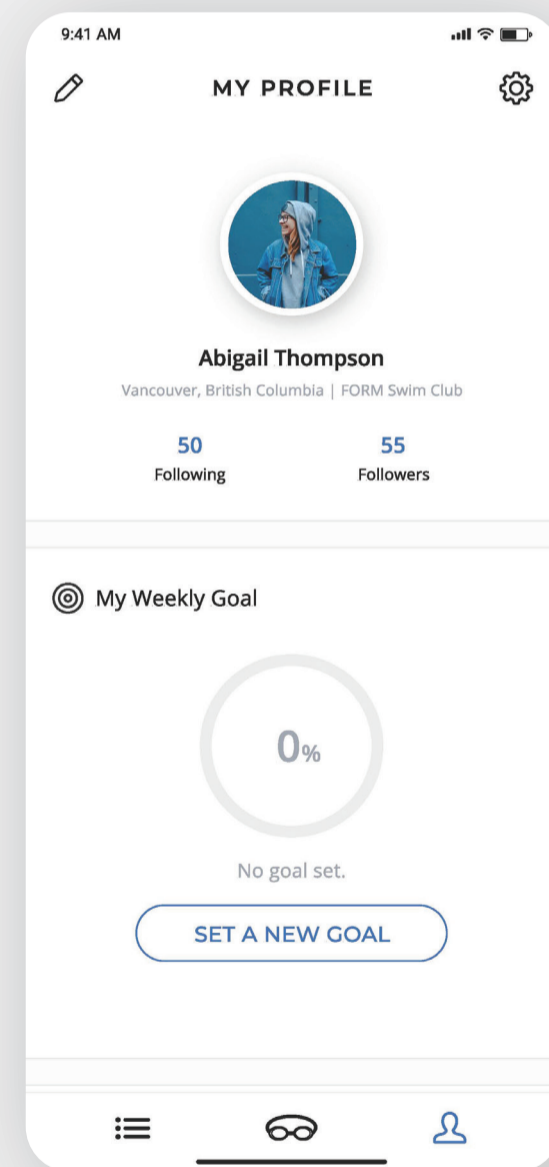

Open Sans Regular - Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut laoreet dolore magna aliquam erat volutpat. Ut wisi enim ad et minim veniam, quis nostrud exercitation ullamcorper suscipit lobortis nisl ut aliquip ex ea commodo consequat. Duis autem vel eum iriure dolor in hendrerit in vulputate velit esse molestie consequat, vel illum dolore eu feugiat nulla facilisis at vero eros et accumsan et iusto odio dignissim qui blandit praesent noster id luptatum zzril delenit augue duis dolore te feugait nulla facilisi. Lorem ipsum dolor sit amet, consectetur adipiscing elit, sed diam nonummy nibh euismod tincidunt ut.

APPROACH

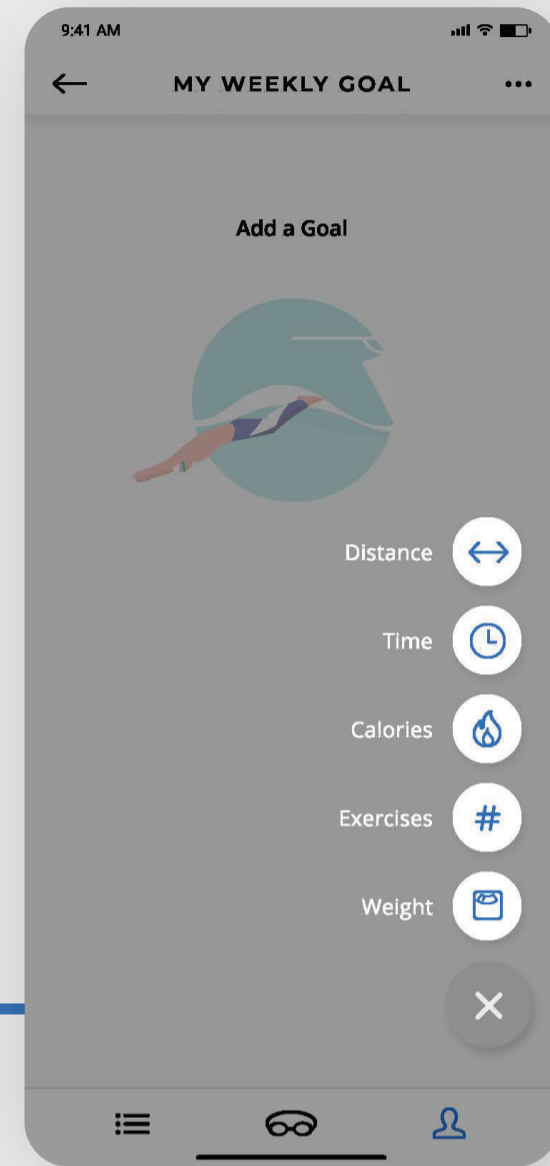

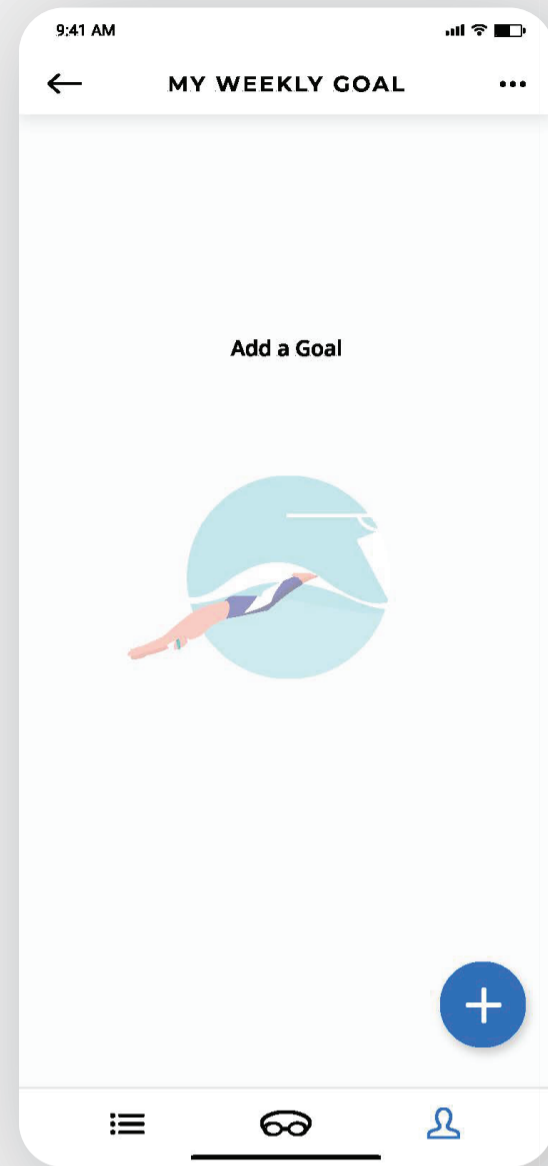

To apply user research and testing to determine the best design for the optimal user experience. Some initial rapid wireframing is applied to the design process to determine new possibilities for the end product.

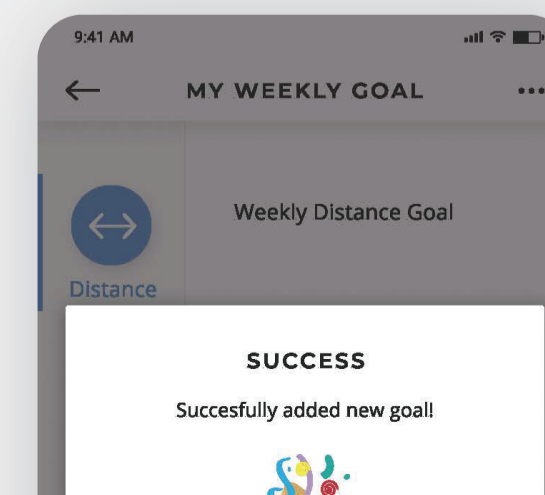

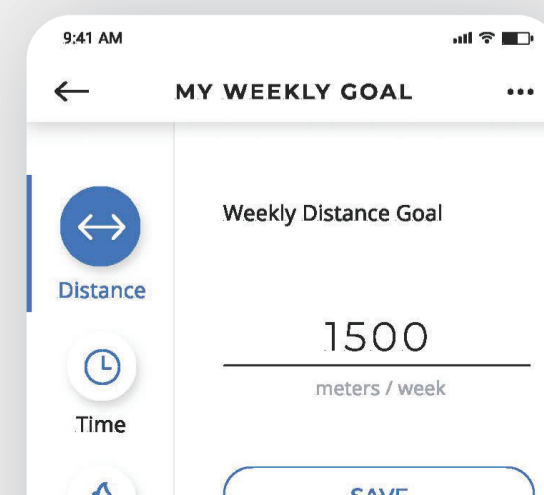

SOLUTION

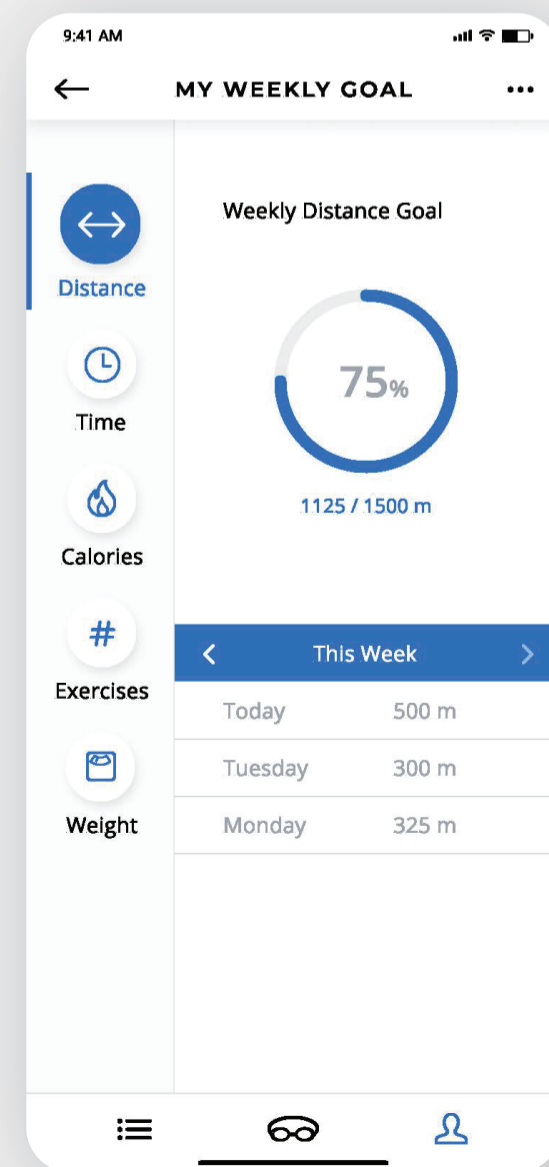

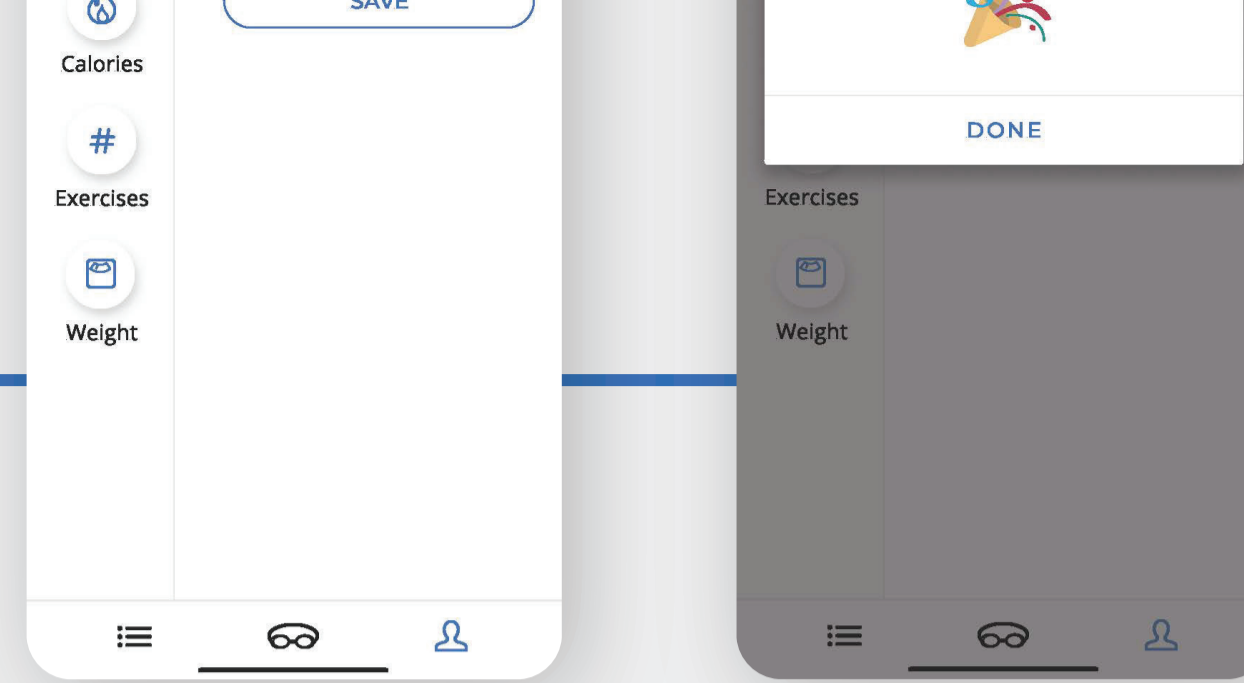

Profile page brings new trends and simplification to the overall layout, to garner new interest for the user.

Visual interests on the page and animated interactions bring a newly enhanced engagement to the user experience.

More fitness goal types are added, and new success interaction features bring satisfaction to the user.

Assets are more cohesive and modern, while the page animations encourage user engagement and add value for users to continue adding their fitness statistics daily into the app.
